Prepared by Sr. Aaron Wong Chuan Xing

Sustainability Strategies

Aligning with the Wawasan Brunei 2035's vision and enriching Brunei's Darussalam economic security, sustainability and prosperity through a low carbon approach, there are three key aspects that the Brunei Darussalam National Climate Change Policy is guided to:

Oil and Gas Exports:

To increase Oil and Gas Production

Environmental Sustainability:

Protect and sustain Brunei Darussalam's environment.

Economic Diversification:

To increase downstream industry reconomic output and to ibncrease new non-oil and non-gased based industry activities.

Strategies

The Brunei Darussalam National Climate Change Policy shall adopt ten key strategies with 2035 as a general target year.

1 INDUSTRIAL EMISSIONS
Reduce overall emissions in the industrial sector through zero routine flaring and to As Low As Reasonably Practicable (ALARP).

2 FOREST COVER
Increase carbon sink through afforestation and reforestation with a target of planting 500,000 new trees.

3 ELECTRIC VEHICLES
Increase total share of Electric Vehicles to 60% of total annual vehicle sales.

4 RENEWABLE ENERGY
Increase total share of renewable energy to at least 30% of total capacity in the power generation mix.

5 POWER MANAGEMENT
Reduce GHG emissions by at least 10% through better supply and demand management of electricity consumption.

6 CARBON PRICING
Impose price on carbon emissions.

7 WASTE MANAGEMENT
Reduce municipal waste to landfills to 1kg/person/day.

8 CLIMATE RESILIENCE & ADAPTATION
Increase capacity to adapt to climate impacts and in achieving resilience.

9 CARBON INVENTORY
Mandatory monthly and annual reporting of carbon inventory.

10 AWARENESS & EDUCATION
Increase awareness and education surrounding mitigation and adaptation responses against climate change.
